Executive Summary

Indonesia's beverage market is undergoing a structural shift as consumers become more health-conscious and increasingly prioritize practical, on-the-go consumption. For NutriSari Tea Series, this creates both an opportunity and a strategic challenge. Although NutriSari remains a familiar and affordable beverage brand, its Tea Series has not yet become strongly embedded in the daily habits of modern young consumers. The problem lies not in the absence of market potential, but in a relevance gap: NutriSari Tea Series is still constrained by low product awareness, limited retail visibility, weak lifestyle integration, and the mismatch between its traditional powdered format and the growing demand for ready-to-drink alternatives. This issue is reinforced by the consumer journey analysis, which shows that passive awareness has not been effectively converted into sustained interest, trial, and repeat consumption.

The study combines primary and secondary analysis to validate this challenge. Findings from the main survey (n = 87) show that 83.9% of respondents prefer ready-to-drink formats and 80.5% are interested in lower-sugar beverages, while only 33.3% are aware of NutriSari Tea Series and only 23% know that NutriSari already offers a lower-sugar variant. In addition, follow-up responses (n = 51) indicate that, among respondents who are more familiar with Tea Series, interest is stronger, with taste, practicality, healthier perception, and reward-based engagement emerging as key drivers of appeal. Field observation further reveals that NutriSari products often suffer from low in-store visibility, especially in traditional and modern retail environments where shelf placement and product presentation fail to support discovery and trial. Together, these findings confirm that NutriSari's challenge is a combination of perception gap, format gap, conversion gap, and retention gap.

To address these issues, this proposal introduces the **FRESH Framework**, an integrated strategy designed to transform NutriSari Tea Series from an occasional powdered beverage into a daily consumption habit. **Find Your Fresh** drives engagement through gamified QR-based rewards and storytelling-led digital communication; **Reward the Retail** improves visibility and purchase conversion through distributor-led retail activation; **Energy in Motion** serves as the core growth engine through the introduction of ready-to-drink Tea Series formats; **Share the Refreshment** strengthens brand relevance by embedding the product into lifestyle and collaboration-based consumption moments; and **Healthy Habits** reinforces long-term retention through reward-based recycling and sustainability participation. Supported by structured market sizing and a financially feasible implementation logic, the strategy aims to reposition NutriSari Tea Series as a healthier, more practical, and more lifestyle-relevant beverage for Gen Z, while building a scalable system for adoption, repeat purchase, and sustainable brand growth.

Problem Identification and Causes

1.1 Background

The beverage industry in Indonesia is undergoing a structural shift driven by **increasing health awareness**, particularly regarding sugar consumption. Diabetes prevalence has reached **11.3% among adults**, with sugar-sweetened beverages identified as a major contributing factor (International Diabetes Federation, 2025). National sugar consumption remains high at approximately **7.6 million tons annually**, placing Indonesia among the largest sugar consumers globally (Santika E. F., 2025). Meanwhile, the Ministry of Health recommends a maximum **daily sugar intake of 50 grams**, yet a single ready to drink (RTD) beverage can contribute up to **34.8% - 35.7% of this limit** (Yustiyani, 2024). At the same time, lifestyle changes, particularly among Generation Z are accelerating demand for convenient and on-the-go consumption, positioning **RTD beverages as a dominant category** in daily consumption patterns (Shubham, 2026). This shift reflects a broader transition from preparation-based to instant consumption behavior. Within this context, tea holds a unique position as a beverage already embedded in Indonesian daily habits. This creates a strategic opportunity for NutriSari Tea Series to transition from a powdered drink into a more relevant, healthy, and convenient daily beverage aligned with evolving consumer expectations.

1.2 Problem Identification

To understand the declining relevance of NutriSari Tea Series, this study integrates primary survey findings ([Appendix B](#)) with market and consumer behavior analysis.

Figure 1 Root Cause Identification

Analysis

2.1 Primary Data Findings and Analysis

2.1.1 Online Survey Findings

Based on primary survey findings ([Appendix B](#)), To better understand consumer behavior and identify key gaps in awareness, consumption, and engagement, a primary survey was conducted with 87 respondents. The analysis focuses on consumption patterns, health awareness, product familiarity, and behavioral tendencies to uncover key drivers and barriers influencing NutriSari's relevance in the current market.

Online Survey Findings (N=87)

Figure 2 Online Survey Findings N=87

(Source: Team Analysis)

To further validate and deepen the initial findings, a second survey with **51 respondents** was conducted, focusing on sustainability perception, collaboration interest, and behavioral triggers. This additional dataset provides more targeted insights into consumer motivations, particularly in relation to incentives, emotional engagement, and participation-driven behavior.

Online Survey Findings (N=51)

Figure 3 Online Survey Findings N=87
(Source: Team Analysis)

2.1.2 Field Observation and Findings

Field observations conducted across traditional (warung), modern retail channels (Indomaret) and larger supermarkets (Hero / Hypermart) reveal a significant gap in NutriSari's in-store visibility and product positioning. **In traditional outlets**, NutriSari sachets are displayed alongside various competing products in densely packed **hanging layouts**, causing the **brand to blend in** and **lack visual distinction** while also **lacking in variations**. In modern retail settings, NutriSari products are often placed in **lower shelf positions, below eye level, and overshadowed by ready-to-drink beverages** and dairy products that dominate more strategic shelf spaces. The most variative lies in big markets like Supermarkets who has many different NutriSari products.

Notably there is a constant theme lingering with this observation, the **NutriSari Tea Series shows minimal to no presence** and lacks dedicated placement or visual communication, limiting its recognition among consumers. These findings indicate that beyond perception and product challenges, NutriSari also faces a critical visibility gap at the point of purchase, which reduces consumer awareness, trial, and ultimately product adoption ([Appendix C](#)).

2.2 Secondary Data Findings and Analysis

2.2.1 Health Trend and Sugar Consumption

Rising health awareness has significantly influenced beverage consumption patterns, particularly among younger consumers. In Indonesia, concerns over excessive sugar intake have increased, with studies showing that over **65% of consumers actively try to reduce sugar** consumption in their daily diet (World Health Organization (WHO), 2023). This trend is reinforced by the government's implementation of sugar reduction campaigns and growing public discourse on non-communicable diseases such as diabetes, which affects approximately 10.6% of the population (International Diabetes Federation, 2025). Globally, the demand for low-sugar and functional beverages continues to grow, with over 50% of consumers **indicating a preference for healthier drink options** (NielsenIQ, 2023). However, despite this high level of awareness, a persistent attitude–behavior gap remains, where consumers do not consistently translate health intentions into actual purchasing decisions (McKinsey & Company, 2022). This indicates a strong opportunity for brands to bridge the gap by offering convenient, accessible, and behaviorally engaging healthy beverage solutions.

2.2.2 Growth of Ready to Drink and Convenience Consumption

The Ready-to-Drink (RTD) beverage market has experienced significant growth, driven by increasing **demand for convenience and on-the-go consumption**, particularly among urban and younger consumers. In Indonesia, the RTD tea segment remains one of the largest contributors to the beverage category, supported by strong distribution and habitual consumption patterns (Euromonitor International, 2023). Globally, the RTD beverage market is projected to grow steadily, with consumers prioritizing practicality, portability, and immediate consumption over preparation-based formats such as powdered drinks (Grand View Research, 2024). Additionally, studies indicate that over **60% of consumers prefer beverages that are easy to consume** during commuting or daily activities, reinforcing the shift toward ready-to-consume formats (NielsenIQ, 2023).

2.2.3 Consumer Behavior and Youth Market Dynamics

Consumer behavior, particularly among Gen Z, has shifted significantly toward interactive, experience-driven, and reward-based engagement. Studies indicate that over **70% of Gen Z consumers prefer brands that offer personalized** and interactive experiences rather than passive consumption (Deloitte, 2023). Additionally, Gen Z demonstrates a strong inclination toward **gamified systems and instant gratification**, with approximately 60% showing higher engagement **with brands that provide rewards, challenges, or point-based incentives** (McKinsey & Company, 2022). Social interaction and participation also play a crucial role, as more than **75% of Gen Z consumers are influenced by peer engagement and user-generated** content when interacting with brands (NielsenIQ, 2023). However, despite high engagement potential, consumer attention remains highly fragmented, requiring brands to **create continuous and engaging touchpoints** to sustain interaction (PwC, 2023). These trends highlight the importance of integrating gamification, social participation, and reward-based systems to effectively capture and maintain consumer engagement.

2.2.4 Brand Perception and Product Awareness Gap

Historically, NutriSari has been positioned strongly within the powdered fruit drink category, indicating that the brand already possesses high baseline recognition in Indonesia's beverage market (Sulistiyanto, 2015). At the same time, the broader flavored powder drinks category **remains large and continues to show growth**, both globally and in Indonesia, suggesting that the core issue is not the absence of category demand, but rather the need to maintain relevance as consumer preferences evolve (Grand View Research, 2023; Ken Research, 2023). This creates a perception challenge for **NutriSari Tea Series, where the brand's established association with affordable powdered beverages** may limit consumer awareness of newer, healthier, and more modern product extensions.

2.2.5 Retail Visibility and Traditional Trade Relevance

Traditional trade remains highly important in Indonesia's FMCG landscape, with *warung* and other traditional stores continuing to dominate sales channels, making them a critical touchpoint for product visibility and purchase conversion (Santika, 2025). In this context, NutriSari's accessibility and affordable price **positioning make traditional retail especially relevant**, since products sold through *warung* are often purchased impulsively and depend heavily on display presence, recommendation, and shelf visibility (Santika, 2025; Retail price observation, 2026). Therefore, improving retail visibility is not only a distribution issue, but also a **strategic conversion lever for strengthening Tea Series** adoption in everyday purchase environments.

2.2.6 Lifestyle and Experiential Marketing Relevance

Studies on Gen Z food and beverage behavior also suggest that healthier consumption is more likely to gain traction when it is communicated in ways that **feel relatable, practical, and aligned** with everyday routines rather than purely instructional (Ulita et al., 2024). In parallel, **creator- and influencer-led communication has become increasingly important** in Indonesia, as influencer content significantly shapes consumer perceptions and behavior, especially among digitally active audiences (Vero Asean, 2024). Together, these insights support the use of campus, sports, and social lifestyle activations as a relevant way to reposition NutriSari Tea Series.

2.2.7 Collaboration and Co-Branding Opportunity

Cross-industry collaboration and co-branding can strengthen brand growth by improving differentiation, innovation, and market expansion, particularly when partnerships combine functional value with symbolic appeal (Pengmao, 2025). This is further reinforced by research showing that product characteristics such as **uniqueness, scarcity, and self-expression** can enhance perceived value, build brand trust, and increase purchase intention among young consumers (Ha, 2021). In the Indonesian context, the growing popularity of tumblers among Gen Z reflects not only utility, but also **trend-driven self-expression and social influence**, making tumbler-based collaboration a strategically relevant extension for NutriSari Tea Series (Effendi, 2024). As a result, co-branded bundles can serve as more than promotional tools they can help embed the product into lifestyle-based usage occasions.

2.2.8 Sustainability and Reward-Based Recycling Potential

Reward-based sustainability mechanisms have strong behavioral potential, as research shows that reward systems significantly increase consumers' willingness to **participate in packaging recycling**, with immediate rewards being particularly effective in encouraging action (Zhan et al., 2024). This approach is also relevant to Nutrifood's **existing sustainability orientation**, as the company has already highlighted partnerships related to waste reduction, recycling, and responsible production practices through its **sustainability initiatives** (Nutrifood Indonesia, 2023).

2.3 STP and PDB Analysis

To ensure that the proposed solution is strategically aligned with market needs, this study applies Segmentation, Targeting, and Positioning (STP) analysis alongside Points of Difference and Points of Parity (PDB). STP is used to identify the most relevant consumer segments and define NutriSari's strategic focus, while PDB analysis helps clarify how the brand can differentiate itself while maintaining essential category expectations. Together, these frameworks provide a structured foundation to reposition NutriSari as a more relevant, engaging, and lifestyle-driven beverage for modern consumers.

Figure 4 STP and PDB Analysis
Source (Team Analysis)

2.4 Market Sizing Analysis

To evaluate the market potential and scalability of the proposed solution, a market sizing analysis was conducted using the Total Addressable Market (TAM), Serviceable Available Market (SAM), and Serviceable Obtainable Market (SOM) framework. This approach provides a structured estimation of the total market opportunity, the relevant target segment, and the realistic share that NutriSari Tea Series can capture within the defined time frame (2026-2029).

*Figure 5 Market Sizing Analysis
Source (Team Analysis)*

2.5 Consumer Journey Framework

The consumer journey analysis reveals that the key challenge lies not only in generating awareness, but in converting initial interest into sustained consumption behavior. While consumers may recognize NutriSari as an affordable and familiar brand, low product awareness, limited engagement, and lack of convenience hinder progression across the journey stages. At the awareness and interest stages, the absence of interactive and emotionally engaging touchpoints reduces consumer curiosity.

During purchase and consumption, the dominance of ready to drink alternatives and the lack of habit-forming mechanisms further limit repeat usage. Additionally, weak emotional connection and minimal post-consumption engagement result in low brand loyalty. These gaps highlight the need for an integrated strategy that addresses each stage of the journey, transforming passive awareness into active participation and long-term behavioral engagement.

Figure 6 Consumer Journey Analysis
Source (Team Analysis)

2.6 Competitor Analysis

To gain a comprehensive understanding of the competitive landscape, a structured competitor analysis framework is employed by evaluating key dimensions, including **product proposition, brand positioning, communication strategy, distribution presence, and pricing**. This multi-dimensional approach enables a holistic comparison of NutriSari with its primary competitors in the powdered beverage category, such as Jasjus, Marimas, Teajus, and Pop Ice. While most competitors **compete aggressively on affordability and mass distribution**, their value propositions are largely centered on functional benefits, flavor variety, and price competitiveness. Additionally, their communication strategies tend to focus on short-term appeal such as fun, refreshment, and trend-driven content without establishing deeper consumer engagement or long-term brand relationships.

This framework highlights a critical gap in the market, where competition remains heavily product-driven and transactional, with limited emphasis on experiential, interactive, and lifestyle-oriented engagement. Such conditions present a strategic opportunity for NutriSari to differentiate itself by moving beyond traditional positioning and developing a more integrated ecosystem that combines product, engagement, and behavioral reinforcement.

Competitor Analysis	NutriSari	Semua Suka JASUS	MariMas	Teajus	pop ice
Product Proposition	- Fruit-based powdered beverage - Known for vitamin C & nutrition positioning	- Budget fruit flavored powder drink - Vitamin C fortified	- Fruit flavored powdered drink with strong taste - Very large flavor portfolio	- Instant tea powder drink - Tea aroma preserved through granulated powder	- Milk-based powdered drink - Dessert-style beverage (milkshake style)
Brand Positioning	- Trusted legacy brand (since 1979) - Emphasizes taste + nutrition	- Ultra-affordable everyday drink - Positioned as simple thirst quencher	- Fun fruit drink brand - Focus on flavor variety & strong taste - Appeals to youth and families	- Positioned as instant tea convenience drink - Substitute for brewed tea	- Fun milkshake style drink - Positioned as "idol drink" / trendy snack drink
Communication & Branding	- Communication around health & vitamin C - Often uses family + healthy lifestyle messaging	- Bright packaging with fruit visuals - Focus on fun & refreshment	- Heavy use of influencer marketing - Viral marketing campaigns	- Minimalistic communication - Focus on refreshing tea experience	- Cartoon / youth oriented visuals - Strong digital presence & flavor campaigns
Channel & Distribution Presence	- Nationwide distribution - Strong presence in small retailers	- Extremely strong warung penetration - Mass distribution via Wings network	- Nationwide distribution - Strong presence in small retailers - Also exports to several countries	- Distributed through Wings network - Available in supermarkets, minimarkets, kiosks	- Nationwide + international distribution - Strong presence in school canteens & small stalls
Price Points & Affordability	Mass-affordable powdered drink segment. (IDR 1.5K – 3K / sachet)	Ultra-budget powdered drink segment. (IDR 0.5K – 1K / sachet)	Budget powdered fruit drink segment. (IDR 0.5K – 1K / sachet)	Affordable instant tea powder segment. (IDR 1K – 2K / sachet)	Premium-mass milkshake powder segment. (IDR 2K – 3.5K / sachet)

Figure 7 Competitor Analysis
Source (Team Analysis)

Solution Recommendations

3.1 Strategic Overview

The proposed strategy aims to transform NutriSari Tea Series from an occasional powdered beverage into a daily consumption habit by addressing key gaps across the consumer decision journey. Rising health concerns, reflected in Indonesia's 11.3% diabetes prevalence and high sugar consumption levels, are shifting consumer preference toward lower-sugar beverage options (Santika, 2025). At the same time, the **ready-to-drink (RTD) tea market** has reached approximately USD 1.1 billion, driven by demand for convenient, **on-the-go consumption** (Shubham, 2026). Preliminary findings from the main survey (n = 87) indicate that **83.9% of respondents prefer RTD formats and 80.5% are interested in lower-sugar beverages**, while only 33.3% are aware of NutriSari Tea Series and only 23% know that NutriSari already offers a lower-sugar variant.

This highlights a strong alignment between market trends and consumer needs, but also reveals a conversion gap where NutriSari's high brand awareness does not translate into daily consumption. Follow-up responses (n = 51) further show that, among

respondents who are more familiar with Tea Series, interest is stronger, with taste, practicality, and healthier perception emerging as the main drivers of appeal.

Therefore, this strategy introduces an integrated system consisting of RTD product innovation as the core driver, supported by retail activation and gamification to enhance conversion and retention, as well as collaboration and sustainability initiatives to strengthen long-term brand relevance.

NutriSari FRESH					
NutriSari	Find Your Fresh	Reward the Retail	Energy in Motion	Share the Refreshment	Healthy Habits
Objectives	Increase consumer awareness that NutriSari offers tea-series variants to modern consumers	Increase product visibility and purchase conversion in traditional retail channels.	Position NutriSari as part of an active and modern lifestyle.	Elevate brand perception and embed the Tea Series into consumers' lifestyle and social habits.	Encourage sustainable consumption behavior while strengthening brand engagement.
What	A modern social media campaign ("Where Is Your Fresh?") paired with a web-based QR gamification system.	Increase product visibility and purchase conversion in traditional retail channels.	Expanding the Tea Series into 350ml and 1L Ready-To-Drink (RTD) formats.	high-value, functional lifestyle collaboration serving as the ultimate loyalty reward.	Launch a Sachet Recycling Reward Program to incentivize responsible disposal and recycling.
Problem	The product lacks modern social relevance, or motivation for consumers to do repeated purchases	Retail partners often prioritize products with stronger promotional incentives.	Powdered drinks in general often seen as a hassle and isn't a priority pick, especially in social situations	NutriSari lacks strong lifestyle integration; it is rarely viewed as a premium or trendy brand that younger demographics want to be seen consuming publicly.	Single-use packaging contributes to growing plastic waste concerns in Indonesia.
Solution	 Social media education content  TeaSeries Streak Challenge	 Distributor and Warung Reward Program	 Ready To Drink Variants of the Tea Series	 LocknLock "Shake 'n Fresh" Tumbler collab	- Sachet recycling exchange program - Sustainability awareness campaign 
What	Gen Z consumers are highly responsive to interactive, reward-based systems and storytelling that connects with their daily routines.	Traditional retail stores remain one of the most important purchasing channels in Indonesia.	Consumers increasingly prefer convenient, zero-prep beverage formats. RTD is experiencing rapid market growth.	Experiential marketing and practical, aesthetically pleasing lifestyle items drive long-term retention.	Gen Z increasingly prioritizes brands with actionable environmental responsibility

World Health Organization (2022), International Diabetes Federation (2025), World Bank Retail Market Study, McKinsey Consumer Behavior Report (2023), World Bank (2021), Indonesia Plastic Waste Study

Figure 8 Overview FRESH Initiative
Source (Team Analysis)

Find Your Fresh:

Despite strong brand awareness, **NutriSari lacks daily engagement**, limiting repeat consumption. Meanwhile, **Gen Z consumers are highly responsive to interactive and reward-based systems**^[1]. Therefore, Find Your Fresh introduces a gamified ecosystem and a **fresh new look** centered around **NutriSari Tea Series** to transform one-time purchases into continuous consumption behavior and transition into a modern appeal.

Scan For Fresh

The system operates through a simple yet scalable mechanism

Purchase → Scan → Earn → Redeem → Repeat

Built as an exclusive, limited-run campaign, this system rewards consumers for scanning QR codes located strictly on **Tea Series variants**. Users can exchange their points for a variety of prizes, headlined by **exclusive, limited-edition rewards**. To reinforce daily habit formation during the campaign window, the experience is heavily gamified with streak-based rewards, a 7 Days Tea Challenge, and referral bonuses.

Energy In Motion

Energy in Motion introduces NutriSari Tea Series in RTD formats, including 350ml for individual, on-the-go consumption and 1-liter variants for shared occasions. RTD tea market continues to grow significantly, indicating a clear shift toward ready-to-drink formats^[1].

From Occasional Drink

into Everyday Habit

Key Drivers:

This initiative is driven by **three key factors**: the increasing demand for **convenience**, **growing health consciousness**, and **urban lifestyle patterns** that emphasize mobility and social consumption.

Making the Tea Series Ready-To-Drink (RTD) is our **core growth engine**. It bridges the gap between NutriSari's **legacy powder format** and the **fast-paced lifestyle** of modern consumers, transforming a planned, at-home drink into an immediate, frictionless refreshment.

- **Zero Prep:** Matches Gen Z's need for immediate, on-the-go convenience.
- **More Occasions:** Enters daily routines (like commutes) that sachets can't reach.
- **Category Growth:** Taps into the highly profitable RTD tea market.
- **Seamless Scanning:** The bottle acts as the perfect physical vehicle for our QR reward loop.

Exhibit 4: NutriSari Ready to Drink Formats

The Debut Phase

Leveraging Reward the Retail

Distributors will softly push the products so:

- NutriSari bottles will be **present** in stores.
- Actively promoted during **point of purchase**.

Exhibit 5: NutriSari Ready to Drink in Stores

The Campaign

Exhibit 6: NutriSari Ready to Drink Content

- **The Refresher:** Hook NutriSari Tea bottles as a daily refresher for Gen Z.
- **#FindYourFresh:** Leveraging the campaign, drawing interest with fun and interesting content.
- **The Flow:** Start with a dramatic, low-energy hook (the "debuff"), introduce the NutriSari RTD as the solution, and showcase the vibrant, energized transformation.
- **Star Power:** Leverage micro-influencers to help create content for bigger awareness

Share The Refreshment

Integrated across the FRESH framework, the **collaboration enhances multiple touchpoints** serving as a **reward within the gamification system**, a **bundled offering within retail channels**, a **consumption medium for RTD products**, and a **sustainability enabler**^[1].

From Beverage

into
Lifestyle

Insight!

While NutriSari has traditionally been positioned as a functional beverage, **it lacks integration into consumers' daily lifestyle and social consumption** moments. This creates a gap where the product is **consumed occasionally**, but not embedded into everyday routines. To address this,

Share the Refreshment introduces a **strategic collaboration** with:

LocknLock

to develop a **Healthy Hydration Kit**, combining NutriSari Tea Series with reusable tumblers designed for daily use.

Exhibit 7: LocknLock X NutriSari Tea Series

Partnership Cycle

Why Lock N Lock?

- **Brand Elevation:** Upgrades NutriSari's image from a basic drink to a premium lifestyle habit.
- **Product Synergy:** A high-quality tumbler is the perfect vessel for their beverage.
- **The Hook:** It's a coveted, high-value prize strong enough to guarantee customers will actually finish the daily streak challenge.

Whats *The* Impact?

+20%

Brand Perception

+15%

Engagement

+25%

Repeat Usage

Key Drivers:

This initiative is driven by **three key factors**: the rise of **lifestyle-based consumption**, increasing **sustainability awareness**, and the importance of **aesthetic and social identity** among Gen Z consumers.

Healthy Habits

Despite growing awareness of environmental issues, consumer participation in sustainable behavior remains low due to a **lack of direct incentives** and **integration into daily routines**. At the same time, plastic waste contribute significantly to environmental degradation.

Moving and Jumping

into A Healthier Future

Key Drivers:

The initiative is driven by three **key factors**: rising **sustainability awareness**, the effectiveness of **reward-based behavior**, and **emotional connection** through **purpose-driven campaigns**.

Recycle Points

Exhibit 9: Fun Run Event NutriSari

71.6%^[1] of findings have expressed interest on the idea of recycling NutriSari sachets for rewards. Leveraging our **FunRun** programs. We can spearhead towards a more green image while also creating more reason for consumers to partake in **NutriSari's Journey on going green**

The Rewards

10 Sachets = Voucher for a free drink in any partnered warungs

100 Sachets = Extra Points for NutriSari Merchandise Web.

How Does It Work?

During the Fun Runs, **Recycle Zones** will be present at the start and end zones. Consumers who are interested for the rewards drop off any sachets they might bring before the event, or after the main run event.

The Impacts:

- **Direct Sales Driver:** To get empty sachets, consumers must buy the product. The gamified tier system incentivizes bulk buying and repeat purchases.
- **Brand Shift:** NutriSari transitions from being a contributor to single-use plastic pollution to an active driver of the circular economy.

Exhibit 10: Fun Run Event NutriSari Convertible

During the NutriSari Fun Run events, participants who buy NutriSari products are **encouraged** to keep their used sachets and bring them to the **Recycle Booth**. After the sachets are checked by staff, participants receive rewards based on the number returned. The collected sachets are then directed to recycling partners for further processing. Through this system, Healthy Habits turns simple product consumption into a **more responsible** and **repeatable sustainability action**.

Survey online findings^{[1],[2]}

Implementation and Impact

4.1 Timeline

Figure 9 Implementation Roadmap
Source (Team Analysis)

The implementation roadmap is designed as a phased strategy to ensure structured execution and scalability of the FRESH framework. The first phase (Foundation) focuses on **establishing the core system infrastructure**, including the development of the QR-based reward system and gamification engine, supported by initial health messaging and social media setup to build awareness. The second phase (Activation) **emphasizes market engagement and adoption** through the launch of ready-to-drink (RTD) products, retail incentive programs, and interactive campaigns such as Car Free Day activations and ambassador-driven content. In the final phase (Expansion and Loyalty), the strategy scales through the implementation of sustainability-driven initiatives, including recycling reward systems and lifestyle collaborations, to reinforce long-term consumer habits and brand loyalty. This phased approach ensures that early system enablement drives subsequent engagement, ultimately leading to sustainable growth and behavioral change.

4.2 Risk Mitigation

To ensure the effective execution of **FRESH**, this section identifies potential risks and outlines mitigation efforts tailored to their impact and severity levels.

Figure 10 Risk and Mitigation

Source (Team Analysis)

Impact & Severity Matrix

Figure 11 Impact and Severity Matrix
Source (Team Analysis)

4.3 Financial Projections

The financial projections indicate that the business is financially viable and scalable over the 2026–2029 period, starting with an initial investment of approximately **IDR 2.09 billion allocated to capital expenditure, pre-launch activities, and working capital**. The company is projected to generate steadily increasing net cash flows, reaching over IDR 3.29 billion by 2029, supported by gradual market expansion and operational scaling. The project yields a positive Net Present Value (NPV) of around IDR 3.1 billion, an Internal Rate of Return (IRR) of **50.07%**, and a payback period of approximately 2.28 years, reflecting strong investment attractiveness while maintaining realistic cost assumptions during growth phases. Detailed calculations and underlying assumptions are provided in the [Appendix I](#).

Conclusion

5.1 Conclusion

This study confirms that the main challenge faced by NutriSari Tea Series is not the lack of master-brand recognition, but its declining relevance among modern young consumers. Although NutriSari remains widely known as an affordable and familiar beverage brand, the findings show that it has not yet been strongly perceived as a modern, healthier, and more convenient daily beverage. The main survey indicates that 83.9% of respondents prefer ready-to-drink formats and 80.5% are interested in lower-sugar beverages, while awareness of NutriSari Tea Series remains limited at 33.3%, and only 23% of respondents are aware that NutriSari already offers a lower-sugar variant. These findings reveal a clear mismatch between evolving consumer expectations and NutriSari's current market perception, which is further reinforced by low retail visibility, limited engagement, and weak integration into lifestyle-driven consumption moments. To respond to this challenge, the proposed FRESH framework offers an integrated and strategically aligned solution by connecting product innovation, retail activation, digital engagement, lifestyle collaboration, and sustainability into one behavioral system. Among its components, Energy in Motion serves as the core growth driver through the introduction of RTD Tea Series formats, while Find Your Fresh, Reward the Retail, Share the Refreshment, and Healthy Habits strengthen awareness, conversion, trial, repeat purchase, and long-term retention. Supported by the consumer journey analysis and market sizing assessment, the strategy demonstrates that NutriSari Tea Series has meaningful room to grow within a realistic and relevant target market, while also building a more contemporary and lifestyle-relevant brand position for Gen Z consumers. Overall, this study concludes that NutriSari Tea Series can enhance its long-term competitiveness by repositioning itself from a conventional powdered beverage into a healthier, more practical, and more relevant daily drink for modern consumers.

5.2 Suggestion

From a strategic perspective, NutriSari should implement this repositioning in a phased and measurable manner. The company should begin by strengthening RTD communication, lower-sugar messaging, and QR-based engagement to improve awareness and stimulate initial conversion. This should then be reinforced by stronger retail execution, lifestyle-based collaboration, and sustainability-driven participation to embed NutriSari Tea Series into everyday consumption habits.

In addition, NutriSari should continuously monitor key indicators such as RTD adoption, repeat purchase frequency, retail sell-out, QR participation, and recycling engagement to ensure that the strategy remains adaptive, scalable, and sustainable over time. By maintaining consistent execution and performance evaluation, NutriSari can improve not only short-term market response, but also long-term brand relevance and consumer loyalty.

Appendices

Appendix A. Company Analysis

NutriSari is a flagship beverage brand developed by Nutrifood, an Indonesian nutrition and food company founded in 1979. Nutrifood focuses on **producing healthier food and beverage products** with a mission to **inspire healthier living**. Over the years, the company has built a diverse portfolio of brands such as **NutriSari, Tropicana Slim, HiLo, and L-Men**, positioning itself as a key player in Indonesia's health-oriented food and beverage industry.

As one of the most recognized **powdered drink brands in Indonesia**, NutriSari has long been known for offering **affordable fruit-flavored beverages** for mass-market consumers. Its wide distribution across traditional retail channels, supermarkets, and convenience stores has contributed to strong brand awareness and accessibility nationwide. In recent years, **Nutrifood has introduced product innovations** such as **NutriSari Less Sugar** variants to respond to increasing consumer awareness of sugar consumption and healthier beverage choices.

However, as consumer preferences evolve toward healthier, lower-sugar, and more convenient ready-to-drink beverages, NutriSari faces increasing pressure to remain relevant among modern consumers. This changing market landscape highlights the need for strategic repositioning to strengthen NutriSari's perception as a healthier and more contemporary beverage option.

- **VISION** :

Visi Nutrifood adalah menjadi pelopor dalam memberikan solusi untuk gaya hidup sehat dan bermakna.

- **MISION** :

Misi mereka adalah menginspirasi gaya hidup bernutrisi dengan memahami kebutuhan pelanggan dan memberikan solusi melalui produk bernutrisi.

FIELD OBSERVATIONS

Where NutriSari lies in:

EVERYDAY SITUATIONS

TRADITIONAL RETAIL

Exhibit 11: NutriSari In Warungs

On the left, Nutrisari is placed among other sachet products, with only the popular 'Jeruk Peras' variant available.

This results in limited consumer choices.

CONVENIENCE STORES

On the right, Nutrisari is placed in a less noticeable location and offers only one variant.

This results in limited consumer awareness

Exhibit 12: NutriSari In Indomaret

SUPERMARKETS

Exhibit 13: NutriSari In SuperMarkets

In the supermarket section, there is a wider range of NutriSari flavors to choose from.

However, the target audience does not usually shop in supermarkets.

WHERE IS YOUR FRESH?

Sweetness and:

BRINGING COLOR TO LIFE

OBJECTIVE

To completely refresh NutriSari social media presence with a bold, eye catching inspired feed takeover that reintroduces the brand to a younger demographic through the "**Find Your Fresh**" concept.

WHAT?

A phased **social media feed revamp** that transitions the brand's visual identity from its traditional look to an explosive a **colorful palette** for the TeaSeries Variant

WHY

- **Scroll-Stopping Power:** Bold visuals cut through clutter, increasing visibility and engagement.
- **Instant Rebranding:** A new aesthetic quickly signals a refreshed brand, generating interest without high costs.
- **Aesthetic Appeal:** A strong eye catching look resonates with Gen Z and Millennials, driving engagement and purchase intent.

THE STREAK CHALLENGE

WHO DOESN'T LOVE STREAKS?

OBJECTIVE

To drive habituation and highly **repeatable purchases** for both NutriSari Tea and RTD formats through a gamified, **daily digital loyalty loop extended from NutriSari's Website**.

HOW?

1. Scan Your TeaSeries

2. Login To Track!

3. Gather Points

4. Exchange for rewards

WHY?

- **The Psychology of Streaks:** Gen Z is already conditioned to maintain digital streaks making it easy to extend that behavior into a daily beverage habit
- **Instant Gratification:** Each purchase delivers an immediate digital reward, reinforcing repeat behavior
- **Data Capture:** Converts offline consumers into a digital ecosystem, enabling tracking of purchase frequency and flavor preferences
